

Student: Chiara CASOLINO

TRAINING

- **2020: Post graduate certification in Archaeology curriculum** Late Antique Archaeology, by Scuola di Specializzazione, Università del Salento, Lecce.
- **2016: MA in Archaeology** - Università degli Studi "G. d'Annunzio", Chieti – Pescara .
- **2019: certification for SIGEC-WEB platform** for digitalization of cultural heritage items.

RESEARCH EXPERIENCE

- Since **2017** part of the **Italian Archaeological Mission in Dürres**, "Progetto Dürres"- Albania (MAECI).
- Since **2017** part of the **Italian Archaeological Mission in Bliesbruck** "Blies Survey Project"- Francia/Germania (MAECI).
- Since **2017** part of the research network "**AdriAtlas**".
- **2020**: scholarship from Università di Chieti on: "**Settlement patterns and trasformations between Late antiquity and Early Middle Ages in the framework of Blies Survey Project and Progetto Durrës**".
- **2018-2019**: scholarship from Scuola di Specializzazione "Dinu Adamesteanu" in Beni Archeologici, Università del Salento, Lecce.
- From **2017 to 2018** participation to the research project "**Corfinio (AQ)**".
- **2017**: scholarship from Università di Chieti on: "**Documenting european projects**".
- **2017**: scholarship from Università di Chieti on: "**Planning of reenactment events and research for themes, and costumes and planning of didactic archaeological labs**".
- **2016**: scholarship from Università di Chieti on: "**Issues on cristian cultural reoccupation of classical buildings**".

RESEARCH PROJECT

Study of the phenomenon of transformation related to urban settlements and minor settlement *in order to classify the phenomenon of transformation **GRADUAL** or **ADAPTIVE***

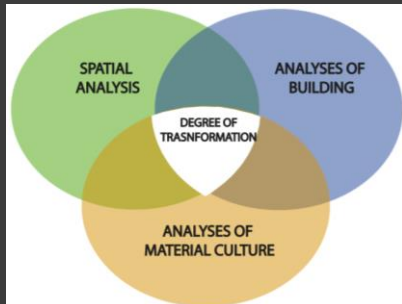

SETTLEMENTS

Durrës (ALBANIAN_ Epirus nova)	Urban center _capital of a Roman province
Corfinio, Amiternum, Alba Fucens, Peltuinum (ABRUZZO_Regio IV)	Urban centres _ <i>municipia</i>
Bliesbruck-Reinheim (FRANCE_Gallia Belgica)	Minor settlement

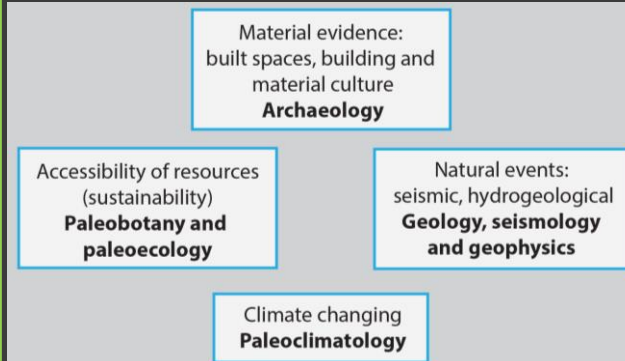

CHRONOLOGY

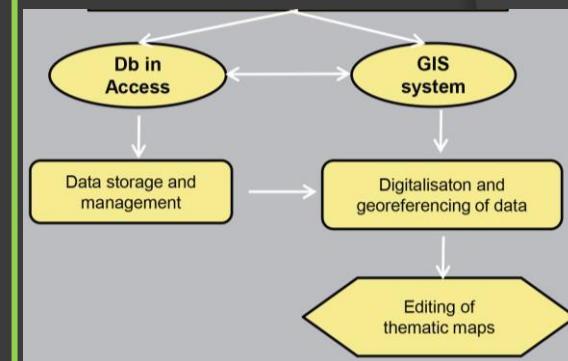

CROSSING OF SPATIAL, BUILDING AND MATERIAL CULTURE DATA

MULTISCIPLINARY APPROACH

TOOLS

RESEARCH GOALS

- ❖ Evaluation of relational trends between functional categories and type of transformation (gradual or adaptive).
- ❖ Calculation of the variation of the intensity of the spatial, building and material culture values from one chronology to another.
- ❖ Evaluation of the type of transformation for a specific chronology in the different urban centers.
- ❖ Global and diachronic reconstruction of changes in specific settlements, identifying adaptive transformations and gradual transformations.
- ❖ Identification of the type of resources accessible or used, in relation to the two classes of transformation (gradual or adaptive).
- ❖ Creation of maps of variation of intensity to different spatial, building and material culture values.
- ❖ Creation of maps of transformation in relation to specific settlements and chronology.

CLASSIFICATION OF THE TYPE OF TRANSFORMATION, OR GRADUAL OR ADAPTIVE

ANALYSIS OF THE TRANSFORMATIONS OF A SETTLEMENT, IN THE DIACHRONIC SENSE, IN ORDER TO HIGHLIGHT ANY PEAKS
